911 and Enhanced 911 Fees and Charges)	

**Comments of Joe Barrows
Executive Director—Kentucky 911 Services Board
State 911 Coordinator-CORRECTION**

A significant error in my comments filed in the above matter on February 8th, 2017 has been called to my attention and should be corrected.

A typographical mistake is made on page 4 of the document in the paragraph which begins "The same research could then be used to determine more accurately how much revenue could be raised by increasing the fee on wireless service."

The mistake is in the next sentence. It is a typographical error, however it alters the meaning of the sentence. The sentence reads "The research referred to already indicates that if the wireless 911 fees (on prepaid and postpaid services) were raised to **41.00** (emphasis added) per month in every state where it is currently less than \$1.00 per month and the disparity between prepaid and postpaid was corrected there would be over one billion dollars in new 911 revenues available nationally (in varying amounts state by state)."

In that sentence the dollar sign "\$" should have been typed instead of the "4" in the emphasized portion of the sentence so that a corrected sentence would read, as follows:

"The research already referred to indicates that if the wireless 911 fees (on prepaid and postpaid services) were raised to a \$1.00 per month, and the disparity between prepaid and postpaid was corrected, there would be over \$1 billion dollars in new 911 revenues available nationally (in varying amounts state by state)."

The corrected sentence should be substituted for the sentence containing the typographic error.

Respectfully submitted,

Joe Barrows
Executive Director
Kentucky 911 Services Board
